"Queen Victoria also. . . ." She stopped a few seconds. . . .
 "Now a great duty has fallen upon me, a great task is set before my
 "soul. Ah! if love could render people happy and content, I am sure
 "all the English would be happy and content with their Sovereigns
 "because we love them so."

"And how the nation loves you, Madam. The King, the Queen
 "are ever reverently and lovingly mentioned like a prayer, like the air
 "they breathe and are thankful for, because it gives them life, like the
 "salt of their bread and their seas."

"The King, the Queen. . . . Yes, the King knows how to make
 "himself beloved. He understands and cherishes the nation. But if
 "they love me it is only because they are so good and true. You cannot
 "imagine how good, how true the people are in England, in all
 "classes everywhere. There are some Princesses and reigning
 "Queens, are there not, who ever feel themselves strangers in the lands
 "that become theirs by marriage? I have never known this feeling,
 "not one single moment, and now I never succeed in discerning that I am
 "not born here; it seems to me as if even my childhood had been spent
 "here, and even when I am away from this land I am not absent. I am
 "here, and I am in every corner of England, as if I belonged to this
 "earth entirely. The people are so good. They partake all our joys
 "and sorrows, and their joys and sorrows are ours."

I looked at the Queen's soft, immaterial form and face—the years
 fell vanquished at the feet of one whose beauty they neither dare
 offend nor touch. I saw again those autumn days at Balmoral, and
 that spring afternoon in Rome. By the open windows the green
 light of the trees entered into the high room at Marlborough House.
 I spoke in my turn. The Queen sat listening, and from time to time
 put in remarks that proved how intently she felt all I said. Her soul
 shone strong and pure on her round forehead, and in her boundless
 eyes that never seem weary of reading life, discovering pain, and
 soothing it. When her Majesty dismissed me she stood there in the
 green light of the neighbouring trees exactly as she had stood in the
 autumn forest, and again she represented Springtime and Hope,
 Serenity and Strength.

I believed the cycle would be closed of my visions of the Northern
 Fairy by the supreme vision of a Queen in Coronation attire, surrounded
 by her Regalia on a glorious June morning, in the sound of bells,
 cannon and song. I was mistaken. Another aspect of hers now rushes
 before the eyes of all who adore her, the sight of a devoted wife
 by the bedside of a King, and bearing in her hands the blessings
 and prayers of all the Empire to soothe his sufferings. Heaven has
 been merciful. The King is saved. The Queen is ready to follow
 him through the glory of their Coronation day. She has accomplished
 all the rites of womanhood, all the duties of a Queen.

THE ALASKA-CANADA BOUNDARY DISPUTE.

THE admission of British Columbia into the Dominion in 1871 caused Canada to become a party to the Alaska boundary dispute: and ever since 1872 urgent and almost yearly requests have been made by the British and Canadian Governments to the Government of the United States for an "expeditious settlement" of the disputed line of demarcation between the newly-joined Province and the Territory of Alaska. The passive resistance of the United States to these requests is inexplicable, unless on the unattractive assumption that the unsanctioned occupation by the United States of disputed British-Canadian territory, and the national insistence in defending that occupation, must ultimately, as in former boundary disputes, assure a diplomatic triumph over Great Britain, and secure to the Republic a further cession of Canadian territory for the enlargement of Alaska. The diplomatic disasters through which Canada has lost some of the best portions of her original heritage* explain why Canadians now look with intense anxiety for the just settlement of the Alaska boundary controversy; for, as was said by Sir Charles Dilke in his *Problems of Greater Britain*, "It is a fact that British Diplomacy "has cost Canada dear."

Ex-President Cleveland, an authority on the diplomatic policy of the United States, has lately furnished in the *Century* what may be an apt foreshadowing of that policy in the Alaska case:—

One or the other of two national neighbours claims that their boundary line should be defined or rectified. If this is questioned, a season of diplomatic untruthfulness and *finesse* sometimes intervenes, for the sake of appearances. Developments soon follow, however, that expose a grim determination, behind fine phrases of diplomacy, and in the end the weaker nation frequently awakens to the fact that it must accede to an *ultimatum* dictated by its stronger adversary, or a despoliation of its territory, and, if such a stage is reached, superior

* See *British and American Diplomacy affecting Canada, 1782—1899*: Toronto, 1890.

strength and fighting ability, instead of suggesting magnanimity, are graspingly used to enforce extreme demands, if not to consummate extensive spoliation.

And he added :—

While on this point we are reminded of the shrewd sharp trader who demands exorbitant terms, and with professions of amicable consideration invites negotiation, looking for a result abundantly profitable in the long range for dicker—a well-known specialty of his countrymen.

The Anglo-Russian Treaty of 1825, which described the now disputed boundary line of demarcation in Alaska, was the final settlement of a keen diplomatic controversy between Great Britain and the United States on the one side, and Russia on the other, over a Russian Ukase of 1821, claiming maritime sovereignty over 100 miles of ocean in Behring Sea. (This Ukase was suddenly revived by the United States in 1886, and under it about 20 British ships were confiscated or driven away, and some of their crews imprisoned and fined; but these proceedings the Arbitration of 1893 decided to be a violation of the Law of Nations.)

The Treaty also settled the long-pending controversy about the territorial boundaries. As was stated by Mr. Justice Harlan, of the Supreme Court, in the Behring Sea Arbitration :—

The positions taken by the United States and Great Britain were substantially alike, namely, that Russia claimed more territory on the north-west coast of America than she had title to, either by discovery or occupation.

During the negotiations for the Treaty of 1825, Russia, while admitting that she had no establishments on the southerly portion of the coast, contended that "during the hunting and fishing seasons, the coast and adjacent waters were exploited by the Russian-American Company, the only method of occupation which those latitudes were susceptible of"; adding, "We limit our requirements to a mere strip of the continent; and so that no objection be raised, we guarantee the free navigation of the rivers." The expressions used by Count Nesselrode, the Russian Minister of Foreign Affairs, in describing the strip of coast, were, "*étroite lisière sur côte*;" "*d'une simple lisière du continent*;" "*d'un médiocre espace de terre ferme*." The free navigation of the waters in the strip of coast was proffered, on several occasions, by Count Nesselrode, with *assuré libres débouchés*; and finally by the Russian Plenipotentiaries in these words :—

His Imperial Majesty's Plenipotentiaries, foreseeing the case where in the strip or border of coast belonging to Russia waters (*fleuves*) should be found, by means of which the British establishments should be made to have free intercourse with the ocean, were eager to offer as a persuasive stipulation the free navigation of those waters.

The British instructions to the Minister at St. Petersburg were as follows :—

In fixing the course of the eastern boundary of the strip of land to be occupied by Russia on the coast, the seaward base of the mountains is assumed as that limit. But we have experience that other mountains on the other side of the American continent, which had been assumed in former treaties as lines of boundary, were incorrectly laid down on the maps ; and this inaccuracy has given rise to very troublesome discussions. It is therefore necessary that some other security should be taken that the line of demarcation to be drawn parallel to the coast as far as Mount St. Elias is not carried too far inland. This should be done by a proviso that the line should in no case, *i.e.*, not in that of the mountains (which appear by the map also to border the coast) turning out to be far removed from it, be carried further to the east than a specified number of leagues from the sea. The utmost extent which His Majesty's Government would be disposed to concede would be a distance of ten leagues ; but it would be desirable if your Excellency were enabled to obtain a still more narrow limitation.

The Russian *centre projet* omitted the mountain summit line, and proposed that the strip of border of coast "*n'aura point en largeur sur la continent plus de 10 lieues marines a parter du bord de la mer.*" The British Foreign Secretary replied, "We cannot agree to this change ;" adding :—

To avoid the chance of this inconvenience, we propose to qualify the general proposition that the mountains shall be the boundary with the condition, if those mountains should not be found to extend beyond ten leagues from the coast.

The following Articles, and the despatch of the British Minister to the Foreign Secretary, stating that "The line of demarcation along the strip of land assigned to Russia is laid down in the Convention agreeably to your directions," show that the British conditions as to the limits of the boundary line were accepted by Russia, and incorporated into the Treaty :—

III. The line of demarcation between the possessions of the High Contracting Parties upon the coast of the continent, and the islands of North America to the north-west, shall be drawn in the manner following: Commencing from the southernmost part of the island called Prince of Wales Island, which point lies in the parallel of 54° 40', north latitude, and between the 131st and the 133rd degree of west longitude (meridian of Greenwich), the said line shall ascend to the north along the channel called Portland Channel, as far as the point of the continent where it strikes the 56th degree of north latitude ; from the last-mentioned point the line of demarcation shall follow the summit of the mountains situated parallel to the coast, as far as the point of intersection of the 141st degree of west longitude

(of the same meridian); and finally, from the said point of intersection the said meridian line of the 141st degree, in its prolongation as far as the Frozen Ocean, shall form the limit between the Russian and British possessions on the continent of America to the north-west.

IV. With reference to the line of demarcation laid down in the preceding article, it is understood, 1st that the island called Prince of Wales Island shall belong wholly to Russia, 2nd, that wherever the summit of the mountains, which extend in a direction parallel to the coast from the 56th degree of north latitude to the point of intersection of 141st degree of west longitude, shall prove to be of a distance of more than ten marine leagues from the ocean, the limit between the British possessions and the strip of coast (*la lisière de côte*), which is to belong to Russia as above mentioned, shall be formed by a line parallel to the windings of the coast, and which shall never exceed the distance of ten marine leagues therefrom (*et qui ne pourra jamais en être éloignée que de ten lieues marines*).

VI. It is understood that the subjects of His Britannic Majesty, from whatever quarter they may arrive, whether from the ocean, or from the interior of the continent, shall, for ever, enjoy the right of navigating freely, and without any hindrance whatever, all the rivers and streams which, in their course towards the Pacific Ocean, may cross the line of demarcation upon the strip of coast (*sur la lisière de la côte*), described in Article III. of the present Convention.

Articles III. and IV. were incorporated into the Russian Treaty of 1867, by which Alaska was ceded to the United States.

And here should be noted the change of expression from "sea" in the draft *projets*, to "Ocean" in the Treaty. In the British draft the words were *depuis la mer*; and in the Russian *du bord de la mer*; in the Treaty they are, 10 *lieues marines de l'Océan*, a more accurate expression. The reason for the change may be found in the argument of Mr. Wheaton before the Supreme Court of the United States: "The sea, technically so termed, includes ports and havens, rivers and "creeks, as well as the sea-coasts." And Mr. Justice Story in another case decided that only the unenclosed waters on the sea-coast, outside the *fauces terrarum*, were high seas (*altum mare*, or *le haut mare*), or ocean. The change of expression, therefore, makes the Treaty line free of any possible doubt, and proves that the line of demarcation of the Russian strip of coast was to be 10 marine leagues from the ocean-coast, and not from the upper shores of inlets, bays or other arms of the sea.

The following commentary on this Treaty, written by Mr. Secretary Blaine to the British Ambassador in 1890, is a diplomatic admission, on behalf of the United States, of "the spirit and intent" of this Treaty:—

It will be observed that Article III. expressly delimits the boundary between British America and the Russian possessions. The delimitation is in minute detail from 54° 40' to the northern terminus of the

coast. The evident design of Article IV. was to make certain and definite the boundary line along the strip of coast, should there be any doubt as to that line as laid down in Article III. It provided that the boundary line, following the windings of the coast, should never be more than ten marine leagues therefrom.

And as to Article VI. :—

Nothing is clearer than the reason for this. *A strip of land at no point wider than ten marine leagues running along the Pacific Ocean* from $54^{\circ} 40'$, was assigned Russia by the 3rd Article. Directly to the east of this strip of land, or, as it might be said, behind it, lay the British possessions. To shut out the inhabitants of the British possessions from the sea, by this strip of land, would have been not only unreasonable, but intolerable, to Great Britain. Russia promptly conceded the privilege, and gave to Great Britain the right of navigating all rivers crossing that strip of land from $54^{\circ} 40'$ to the point of intersection with the 141st degree of longitude. Without this concession the Treaty could not have been made. It is the same *strip of land* which the United States acquired in the purchase of Alaska; the same *strip of land* which gave to British America, lying behind it, a free access to the ocean.

And Senator Washburn, in the debate on the Alaska Treaty of 1867, acknowledged that Great Britain had a Treaty with Russia, "giving her subjects, for ever, the free navigation of the rivers of Russia and America."

The contention of the United States, as stated in a late Magazine Article by Mr. Ex-Secretary Foster is, that "Russia was to have a continuous strip of territory on the mainland *around all the inlets or arms of the sea*;" and that the boundary line was not to cross, as claimed by Great Britain, such inlets or arms of the sea at the distance of 10 marine leagues from the ocean. And he supports his contention by the *argumentum ab inconvenienti*, that "the purpose for which the strip was established would be defeated if it was to be broken in any part of its course by inlets, or arms of the sea, extending into British territory." Great Britain and Canada dispute this "rounding" theory, and contend that the terms used, the minute details as to mountain summits, together with the expression *ne pourra jamais*, which imports an imperative negative and veto on any uncertainty as to the exact *locus* of the line separating the territories of the two nations, clearly indicate that the Russian territory was to be, in the words of the late Mr. Secretary Blaine, "a strip of land *at no point wider than 10 marine leagues, running along the Pacific Ocean.*" And that the Treaty line was to cross inlets and arms of the sea, at the 10 marine league distance, is clear from the Russian "persuasive stipulation," as well as from the 6th Article; otherwise the reciprocal concession of free navigation would be meaningless.

The practical effect of the claim of "a continuous strip of territory "around all the arms or inlets of the sea" would be to nullify the Russian grant of *libres débouchés* through the inlets, or arms of the sea, along the Alaskan strip of coast. Taku Inlet is one-fifth of a mile wide at its ocean mouth, and extends inland for about 23 miles. The United States claim the whole, and ten marine leagues inland, instead of seven miles. Lynn Canal has three ocean mouths (owing to two islands) of four-and-three-quarters, one-and-three-quarters, and one-and-a-half miles wide respectively; and extends inland for about 70 miles; the United States claim the whole as territorial waters, and also ten marine leagues of inland territory. Glacier Bay is three-and-a-half miles wide, and extends inland for about 45 miles from the ocean. The United States claim the upper 15 miles and also 10 marine leagues of inland territory. The 10 marine leagues is equal to 30 marine miles; and the upper waters, beyond that distance, are claimed as British territorial waters. The British territory thus claimed by the United States, beyond the Treaty strip of coast, is 300 miles from north to south, and from 14 to 70 miles wide. These claims completely bar Great Britain's free access to the Pacific Ocean through these inlets and arms of the sea, guaranteed to her by the Treaty of 1825. By the Law of Nations all the above are territorial waters, and have all the legal incidents which pertain to landed territory, except that their waters are subject to what is defined as the "imperfect right of free navigation."

By a strange discordance, however, the United States concede that the international boundary line crosses certain territorial waters, geographically designated "rivers"; but deny that it crosses certain other territorial waters geographically designated "inlets, bays and "canals,"—although both classes of territorial waters are governed by the same general principles of International Law as to the territorial sovereignty. The existence of such inlets, bays and canals cannot therefore possibly sanction an increase in the inland breadth of the *lisière de côte*. A converse line also proves this. Were the 10 marine leagues to be measured seaward from the coast, they would be measured from the sea-mouths, and not from the upper shores, of inlets, or other territorial waters; for these had to be expressly mentioned in the Behring Sea Regulations which prohibit seal-hunting within "a zone of 60 miles around the Pribilof Islands, *inclusive of "the territorial waters."*

But the British contention may be further tested by the acknowledged authorities on International Law. From the many judicial authorities on the law, the following may be cited from the judgment of Mr. Justice Brett (afterwards Lord Esher) in the *Keyn case*: "By "the law of nations,—made by the tacit consent of substantially all "nations,—the open sea, within three miles of the coast, is part of the

"territory of the adjacent nation, as much, and as completely, as if it were the land of such nation."

Wheaton on International Law says, "The maritime territory of every State extends to the ports, harbours, bays, mouths of rivers, and adjacent parts of the sea, enclosed by headlands belonging to the same State. The general usage of nations superadds to this extent of territorial jurisdiction a distance of a marine league, or as far as a cannon shot will reach from the shore, along all the coasts of the State." An early illustration of this law was given by Mr. Justice Story: "Where there are islands enclosing a harbour, in the manner in which Boston Harbour is enclosed, with such narrow straits between them, the whole of its waters must be considered as within the body of the county. Islands so situated must be considered the opposite shores in the sense of the adjoining land down to a line running across." And, "in the sense of the common law, such waters seem to be within the *fauces terrae*, where the main ocean terminates." And Daniel Webster argued that, by the common law, ports and harbours are within the body of the county, consequently not part of the high seas; and a navigable arm of the sea, therefore, is not part of the high seas, which is the open ocean, outside the *fauces terrae*.

These rules of International Law as to the sea-mouths of inlets have been incorporated into the municipal law of the United States. Some of their State laws enact: "The territorial limit of this Commonwealth extends to one marine league from its shore at low-water mark. When an inlet or arm of the sea does not exceed two marine leagues in width, between its headlands, a straight line from one headland to the other is equivalent to the shore line." These laws have been upheld by the Supreme Court; and in giving judgment the Court held that, "as between nations, the minimum limit of the territorial jurisdiction of a nation over tide-waters is a marine league from its coasts; and bays wholly within the territory of a nation, which do not exceed two marine leagues, or six geographical miles, in width at the mouth, are within the limit, and are part of the territory of the nation in which they lie."

The historic evolution of the limit of shore-defence is given in *Bluntschli's Law of Nations*:—

The sovereignty of States over the sea extended originally to a stone's throw from the coast; later to an arrow's shot; firearms were then invented, and by rapid progress we have arrived at the far-shooting of the cannon of the present age. But we still preserve the principle: *Terrae dominium finitur, ubi finitur vis*.

But while the United States have sought to hold Great Britain bound by the six mile sea-mouth in Treaty and other disputes, they have claimed and exercised the rights of sovereignty over bays and inlets around their coast of much wider sea-mouths. In 1793, they

claimed that Delaware Bay, having a sea-mouth of 10.5 miles from headland to headland, widening to 25 miles inland, was part of the maritime territory of the United States, and that the capture of a British ship by a French frigate "within its capes before she had reached the sea" was a violation of the territory and sovereignty of the United States. In 1807 Congress decided that Chesapeake Bay, having a sea-mouth of 12.7 miles from headland to headland, "was within the acknowledged jurisdiction of the United States."

Senator Seward during a Debate in the Senate in 1852 declared that the contention of the United States that only bays six miles wide, or less, at the mouth, could be considered as territorial waters, proved too much, for it would divest the United States of Boston Harbour, Long Island Sound, Delaware Bay, Chesapeake Bay, Albemarle Sound, and others.

This six miles width, however, has been varied in some cases by Treaties which make the sea-mouth ten nautical miles, such as the Anglo-French Treaty of 1839, the Anglo-German Treaty of 1866, and the unratified Anglo-American Treaty of 1888. In the *Netherlands Manual of International Law* it is said:—

The littoral sea, or territorial water, is reckoned to begin from a straight line drawn between the headlands, shoals or islands, which form the mouth, or entrance, of the closed bay or river, and between which the breadth is not more than ten sea miles.

These authorities show that landward of the ocean coast, though indented by, and inclusive of, rivers, inlets, or arms of the sea, of the mouth width of six miles, is the territory of the nation which is sovereign of the coast, to the defined limit of its *dominium eminens*. It must therefore be conceded that, as inlets and land are the same in International Law as to sovereignty, the boundary line must cross each at the ten marine league distance from the ocean.

An American apologist has lately asserted that "no strenuous protest" was made by Canada; and he attempts to excuse the United States' occupation of British Canadian territory by suggesting that the United States may reply: "For some twenty-five years out of the thirty which have elapsed since our purchase of Alaska, it was not worth your while to make any serious effort towards a permanent boundary settlement." The history of the persistent efforts of the British and Canadian Governments to induce the United States to settle the boundary will prove the falsity of the suggested excuse.

(1.) The Treaty ceding Alaska to the United States was signed on the 30th of March, 1867; possession was obtained the following October; and the necessary legislation to give effect to the Treaty was enacted by Congress on the 27th July, 1868. Canada became territorially a party to the dispute on the 20th of July, 1871. On the 12th of March, 1872, attention was called "to the necessity of some

"action being taken at an early date to have the boundary line properly defined." To this Mr. Secretary Fish replied on the 14th of November, 1872, "that he was perfectly satisfied of the expediency of such a measure, but he feared that Congress might not be willing to grant the necessary funds."

(2.) On the 12th of February, 1873, in response to another appeal, "Mr. Fish expressed a doubt whether the necessary expenditure will ever be sanctioned."

(3.) On the 12th of March, 1873, Canada agreed to pay one-half of the British expenditure in marking the boundary.

(4.) On the 23rd of May, 1873, the United States officials in Alaska forbade to British subjects the free navigation of the Stikene and Yukon Rivers, guaranteed to them by the Russian Treaty of 1825, and the Washington Treaty of 1871. The Canadian Government protested, and requested that Treaty rights should be observed.

(5.) On the 16th of January, 1874, the Canadian Government again strongly urged that immediate steps should be taken to define the boundary, as "an alleged conflict of authority had arisen."

(6.) During the same year certain British settlers laid out a town claimed by them to be on Canadian territory, but which the United States officials claimed to be within their territory. The difficulty was discussed with Mr. Secretary Fish, who asked the British Minister what he thought could be done. His reply was, "that the occurrence went to prove the wisdom of the recommendation of Her Majesty's Government, made two years before, that no time should be lost in laying down the boundary between the two territories." Mr. Fish again "feared that it would be difficult to obtain the necessary grant during the next Session of Congress," and suggested that "the settlers should be called upon to suspend operations until the question of territory should be decided,"—now a wearisome suspense.

(7.) On the 23rd November, 1875, the Canadian Government again pressed for "an expeditious settlement of the boundary," and offered to join in measures for fixing the line on the Stikene River; but there was no response.

(8.) In September, 1876, one Martin, a Canadian prisoner (with a bad gaol record), who was being conveyed down the Stikene River, made an assault with a gun on his guards, but was overpowered, brought to Victoria, tried and convicted. Mr. Secretary Fish demanded his release; and, on the advice of the Foreign Office, he was released,—“an action very gratifying to this (U.S.) Government.”

(9.) During the same month a Canadian merchant was notified by a United States official to remove his goods from his store, which he claimed to be on Canadian territory, or pay United States Customs duties,—the official alleging that it was "within the jurisdiction of the United States." The store was afterwards, on a survey, found to be seven miles within Canada.

(10.) The same year, the Secretary of the Treasury intimated that, immediately after the opening of navigation in the spring, the Government would treat certain places as United States territory, and enforce against Canadian settlers the collection of United States customs duties. The Canadian Government reported these facts to the British Government, "so that the rights of British subjects, as they now exist, may be maintained inviolate, pending a determination of the boundary line by the joint authority of the two nations;" and "that it was wholly the fault of the United States Government that it had not been so determined;" adding, "It seems very remarkable that while the United States Government should have hitherto refused, or neglected, to take proper steps to define the boundary, they should now seek to establish it in this manner, in accordance with their own views, without any reference to the British authorities, who are equally interested in the just settlement of the international boundary."

(11.) On the 26th of March, 1877, an urgent appeal was again made to the United States to join in appointing a joint commission to settle the boundary. Mr. Secretary Fish's only reply was that "the attention of Congress had been requested to the matter."

(12.) During the same month the Canadian Government again protested against the action of the United States in treating certain localities as being within United States territory, and urged that British settlers should not be interfered with; and warned the Foreign Office that if a conventional, instead of the Treaty, boundary was proposed, the United States would redouble their pressure for the removal of the British traders, and continue their declinature to investigate the settlement of the boundary, "as they had hitherto declined our proposals for the settlement of the true boundary."*

(13.) On the 1st of October, 1877, Mr. Secretary Evarts was asked to consider "the unsatisfactory state of uncertainty as to the exact boundary between Alaska and Canada;" but he only returned the stereotyped reply that "the subject would again be brought before Congress."

(14.) On the 6th of December, 1877, the Canadian Government again complained of the attempt of the United States to collect Customs duties from British settlers; and protested that the Treasury order was a direction to its officials "to assume that to be Alaska territory which had hitherto been tacitly assumed to be Canadian soil; and which the Canadian Government believed could be proved to be so under the Russian Treaty of 1825." No answer having been received, the Canadian Government next proposed that a survey which had been made at Canada's expense on the Stikene River,

* This has been disregarded; and now, by conventional lines, which are over twenty miles from tide water, arranged between Great Britain and the United States in 1899, Canada's access to the Pacific Ocean, through the Lynn Canal, has been completely barred.

which had ascertained the locality of "10 marine leagues from the "coast," should be accepted by both nations as the boundary line on that river. Mr. Secretary Evarts agreed to this, on behalf of the United States, "on the understanding that the provisional arrangement should not be held to affect the Treaty rights of either party."

Subsequent correspondence up to the Treaty-Convention of 1892 was much to the same effect. But the above facts seem to indicate that there has been no definite Cabinet policy on the Alaska question, and that each department has acted on its own initiative.

Mr. Secretary Fish's despatch on the Martin case may be cited as a rebuke to the *ex parte* action of his Government :—

The absence of a line defined and marked on the surface of the earth, as that of the limit or boundary, between two nations, cannot confer upon either a jurisdiction beyond the point where such line should, in fact, be. That is the boundary which the Treaty makes the boundary ; surveys make it certain, and patent, on the ground, but do not alter rights, or change rightful jurisdiction. It may be inconvenient, or difficult, in a particular case to ascertain whether the spot on which some occurrence happened, is, or is not, beyond the boundary line ; but this is a question of fact, upon the decision of which the right to jurisdiction must depend.

And the remarks of the author of a work on *American Diplomacy* are substantially to the same effect :—

It is not competent for one of the contracting parties to import into a Treaty a construction based upon an *ex parte* interpretation of its text which is not accepted by the other party.

Some years earlier the United States acknowledged that "a generous "spirit of amity" had guided Great Britain in the following declaration :—

It is, therefore, the wish of Her Majesty's Government neither to concede, nor, for the present, to enforce, any rights which are, in their nature, open to any serious objection on the part of the United States.

There is, however, some hope, that by recent Treaty Conventions between the United States and Great Britain the controversy has been simplified ; and that the boundary line of 1825 has been affirmed, and restored to its original authority and international force.

By a Treaty-Convention of the 22nd July, 1892, approved by the Senate on the 25th of the same month, reciting that the United States and Great Britain—

Being equally desirous to provide for the removal of all possible cause of difference between their respective Governments, in regard to the delimitation of the boundary line between the United States and Her Majesty's possessions in North America, in respect to such

portions of the said boundary as may not in fact have been permanently fixed, in virtue of the Treaties heretofore concluded,

the Convention proceeds:—

The High Contracting Parties agree that a co-incident or joint survey (as may in practice be found more convenient), shall be made of the territory adjacent to that part of the boundary line of the United States of America and the Dominion of Canada, dividing the Territory of Alaska from the Province of British Columbia and the North West Territory of Canada from the latitude of $54^{\circ} 40'$ north (Prince of Wales Island), to the point where the said boundary line encounters the 141st degree of longitude westward from the meridian of Greenwich (Mount St. Elias), by Commissions to be appointed severally by the High Contracting Parties, with a view to the ascertainment of the facts and data necessary to the permanent delimitation of the said boundary line, *in accordance with the spirit and intent of the existing Treaties in regard to it, between Great Britain and Russia, and between the United States and Russia.*

The High Contracting Parties agree that as soon as practicable, after the Report or Reports of the Commissions shall have been received, they will proceed to consider and establish the boundary line in question.

By a subsequent Convention the above was re-affirmed, and the time for making the Reports was extended to the 31st December, 1895. The joint Reports were submitted to the respective Governments on that date, but as yet no settlement of the disputed line has been arrived at.

On the 30th January, 1897, another Treaty-Convention between the two Governments was signed for the appointment of Commissioners to make the survey of the 141st degree of west longitude, with a conditional right to deflect slightly, in case the summit of Mount St. Elias did not lie on the said 141st meridian.

Prior to this latter Convention, the town of Forty-mile had been laid out by the United States on the Alaska side, as was supposed, of the 141st parallel of longitude. A joint survey, made under this Convention, proved that the town was locally within Canadian territory; and the United States thereupon conceded that it was "subject to the jurisdiction and laws of the Dominion." No claim was made that it was "a town settled under the authority of the United States," and should therefore "remain within the territory of the United States."

To give effect to the conciliatory, and almost yearly, efforts of Great Britain and Canada, a High Commissioner was appointed in 1898, *inter alia*, to establish a boundary line by a friendly diplomacy, or to refer the settlement of the boundary line of 1825 to Arbitration. Here unfortunately "diplomatic *finesse*," with no result except "damaging and dangerous delay," and indicating "a grim determina-

"tion, behind fine phrases of diplomacy, to enforce extreme demands, "if not to consummate extensive spoliation," so graphically described by ex-President Cleveland, became the policy of the High Commissioners of the United States. Though Great Britain was entitled, by the Convention of 1892, to hold the United States bound by their re-affirmance of the boundary line of 1825, she made a generous and conciliatory offer to waive, for the advantage of the United States, the absolute terms of that Convention, and to concede to the United States the benefit of the fifty-year occupation, or settlement, conditions, imposed by the United States on Great Britain in the Venezuelan Arbitration. The British conciliatory offer was nominally accepted, but was met by a *contre coup*, which practically nullified the fifty-year limitation, by proposing, as a condition of arbitration, that "all towns "and settlements at tide-water, settled under the authority of the "United States, at the date of this Treaty, shall remain within the "territory of the United States,"—in effect a realisation of ex-President Cleveland's "extensive spoliation," and a reversal of the Forty-mile town case, just referred to.

The proposition may be cited as a sample of the superb daring of American diplomacy. The most exhaustive eclectic in diplomacy would vainly search for precedents of a similar *contre coup* in previous diplomatic protocols.

Lord Clarendon once said in a debate on the Oregon question :—

If the United States did consent to negotiate, it would seem that it could only be upon the basis that England was conditionally to surrender whatever might be claimed by the United States.

Ex-President Cleveland has aptly illustrated how unsanctioned occupations influence international diplomacy :—

An extension of settlements in the disputed territory would necessarily complicate the situation, and furnish a convenient pretext for the refusal of any concession respecting the territory containing such settlements.

And again :—

It is uncharitable to see, in reference to possession, a hint of the industrious manner in which [a nation] had attempted to improve its position by permitting colonisation, and other acts of possession, since the boundary dispute began.

The condition in effect proposed that the United States should withdraw their Treaty-pledge of 1892, and that Great Britain should abandon all the sovereign rights, or territorial claims, she might be able to establish before the arbitral tribunal, respecting "towns and "settlements at tide-water settled [even wrongfully on British territory], under the authority of the United States," up to the future date of the proposed Arbitration.

The proposal was entirely inapplicable to the cases of tide-water towns or settlements located by the United States along the ocean coast, or to those along the tide-water shores of the rivers, or inlets, within the ten marine leagues' strip of coast, described in the Treaties of 1825 and 1867. It could only be necessary for determining the fate of towns and settlements located by the United States on the tide-water shores, or inland waters, on the British side of the Treaty line, and the United States, in proposing it, evidently assumed that International Law would warrant the Arbitrators in deciding that such towns and settlements were unlawfully settled by the United States on British territory. Constructively, it proposed a condonation of the unlawful occupation of British territory, and the usurpation of British sovereignty by, and a consequent cession of a portion of the territorial domain of Great Britain in Canada, to the United States.

The British Commissioners declined to consent to such "a marked and important departure from the rules of the Venezuelan Boundary reference," or "that an effect should be given to the occupation of the United States of land in British territory, which reason, justice and the equities of the case, did not require." The *dona ferentes* proposal was thereupon jettisoned; but Arbitration unfortunately suffered shipwreck, and all that survived was a *tabula ex naufragio* of protocol sorrows.

The United States have acquired their present great territorial domain partly by Revolution, and partly by the voluntary gift of Canadian territory from Great Britain,* by purchase from France, Spain and Russia, and by conquests from Mexico and Spain. Under what guileless term should be placed the unsanctioned appropriation of the Canadian Naboth's vineyard, on the British side of the boundary line? For it is now established, beyond question, that during the time Great Britain and Canada were urgently pressing for an expeditious settlement of the boundary line, and protesting against the irritating treatment of British settlers on Canadian lands, the United States were exercising the powers of sovereignty, and were making grants of land within the disputed territory.

If the British contention as to the boundary line shall be ultimately sustained by International Law, and the judgment of an arbitral tribunal, the United States cannot invoke, in support of their present occupation of what shall be found to have been British territory since 1825, any of the rules of that law which are applicable to military occupation, by right of war; or to insurgent occupation, by right of revolution; nor can the doctrine of mistake of title avail, for the British claim was early known, and was supported by conclusive American precedents.

Questions affecting the civil status and citizenship of persons born

* The gift was that part of old French Canada, now the States of Ohio, Indiana, Illinois, Michigan, Wisconsin, and Minnesota, comprising about 300,000 square miles of the Canadian territory ceded by France to Great Britain in 1763.

on, or married, or taking oaths of citizenship within such territory; questions affecting the transfer or descent of property, and of titles acquired under forfeiture laws; questions affecting the administration of civil and criminal jurisprudence, and the imprisonment or execution of criminals; and questions affecting official appointments and municipal and other corporations, and the exercise of legislative and delegated powers of sovereignty, must arise respecting the civil rights, and public relations, and land titles, of the inhabitants of the territory which shall be adjudged to belong to the British Crown, and may lead to far-reaching and expensive litigation; and these questions Great Britain, in view of the urgent and continued protests made, and passively slighted, cannot justly concede.

Citizenship is determined by birth on the soil. The only exception to the universality of this rule was made in the cases of children born in Oregon during its joint occupation by the United States and Great Britain, under the Treaty of 1818. The Courts held that between 1818 and 1846 children born there of British parents were British subjects; and that children born there of American parents were citizens of the United States.

Legislative and Executive Sovereignty and judicial power over territory are incident to the national ownership of the soil. The Supreme Court of the United States has so decided, and has furnished precedents affecting the rights of property within a similarly disputed territory. While Spain was sovereign of Florida, and prior to its cession to the United States in 1795, her Government had made grants of land within a certain disputed territory, which were subsequently impeached. In giving judgment, Chief Justice Marshall said:—

There was no cession of territory. The jurisdiction of Spain was not claimed or occupied by force of arms against an adversary power; but it was a naked possession under a misapprehension of right. In such a case, the United States, within whose sovereignty the land was in fact situated, was not bound to recognise the grants of title by the Spanish Government. We think the Treaty settling the boundary an unequivocal acknowledgment that the occupation of the territory, now acknowledged to be United States territory, was wrongful. It follows that the Spanish grants can have therefore no intrinsic validity.

And in other cases, the Court has held that Patents of land dated before, but not delivered until after, the ratification of a Treaty ceding territory to the United States, were invalid. Similarly, where two States, under a mistake in surveys, granted lands which, on a corrected survey, were found to be within the territory of another State, their grants were adjudged nullities, and inoperative to vest any title in the grantees.

As is stated in *Hall's International Law*:—

To infringe the rights of others remains legally wrong, however

slight in some respects may be the moral inpropriety of the action. If a State commits a trespass upon its neighbour's property, which may, or may not be, morally justified, it violates the law as distinctly, though not so noxiously, as a neighbour would violate it by making a track through a neighbour's field to obtain access to a high road.

The moral accountability of the Government of a nation to kindred nations necessarily involves the moral duty of imposing a reasonable restraint on its political actions, and of so acting in its international relations with such kindred nation as it would reasonably expect such kindred nation to act towards it. President Woolsey has tersely stated one of the rules: "A State is a moral person capable of obligations, "as well as rights, and no acts of its own can annihilate its obligations "to another." And Senator Sumner in supporting the Alaska Treaty of 1867 used words specially pertinent to the Anglo-American Treaty of 1892:—

It is with nations as with individuals: a bargain once made must be kept. I am satisfied that the dishonour of this Treaty, after what has passed, would be a serious responsibility for our country. As an international question our act would be tried by the public opinion of the world.

These principles of national responsibility logically affirm the general rule that the Government of a nation (and the same rule will be universally admitted to be obligatory on land-holding neighbours) is morally bound by the national honour of its sovereignty not to aggressively occupy the territory the title to which is disputed, with some show of Treaty right, by another nation. A passive resistance to, or a positive refusal of, a reference of the disputed claim to what ex-President Cleveland designates as "the honourable rest and justice "found in Arbitration,—the refuge which civilisation has builded for "the nations of the earth, and from which the ministries of peace issue "their decrees," would warrant the judgment of the tribunal of nations that the nation so resisting, or refusing, was attempting a denial of international justice, and was thereby degrading its national honour.

Some writers in the United States advise against submitting the boundary dispute to Arbitration, because the United States "have "nothing to gain and everything to lose;" others because "an adverse "decision would greatly lessen for the United States the present and "future value of the Alaska *lisière*"—a morality illustrated by the maxim, *nous avons l'avantage, profitons en*. And a writer in an English periodical, whose notions of international justice seem equally tainted, has said: "In asking America to submit the whole question to "Arbitration, with evenly-balanced chances of success or failure, we "are asking her to take chances which no democratic Government "can afford to take." One fair inference from these avowals is that international justice and national rectitude are alien principles of action

to democratic Governments. Another logical sequence is that a democratic Government may be the party litigant before itself, as judge and jury, and on its own view of its one-sided and biased evidence, may decide against the territorial rights of an unwarned, because a monarchical, though friendly, Government. The mere mention of such inferences should ensure their universal repudiation ; for the people of the United States have not, even in their demagogic outbursts against England, lapsed from the principles of international justice and national rectitude which form the warp and web of their political responsibility to other nations, and which have long been consecrated by the homage rendered to Christian ethics in their churches, and enforced by the teachings of moral and political science in their colleges.

In the Behring Sea case the United States conclusively showed that "there is an International Law by which every controversy between nations may be adjudged and determined ;" that its rules are moral rules, dictated by the general standard of natural justice, upon which all civilised nations are agreed ; and that, though there are differences in the moral instincts, or convictions, of people of different nations, and no enactments in the ordinary sense of the term, for all members of the society of nations, nor indeed regulating the larger part of the affairs of ordinary life,—there are always existing laws by which every controversy, national or individual, may be determined.

The United States have made themselves the champions of, and have declared their national faith in "the honourable rest and justice found in International Arbitration ;" and at the Hague Peace Conference they pledged their nation "to use their best efforts to secure a pacific settlement of International differences," and joined with Great Britain and other nations in affirming that, "in questions of a legal nature, and especially in the interpretation of International Conventions, Arbitration is recognised by the Signatory Powers as the most effective, and at the same time the most equitable, means of settling disputes which Diplomacy has failed to settle." After urging Great Britain into Arbitration over the Alabama claims, and the Behring Sea fisheries ; and especially after driving her into Arbitration over the Venezuelan Boundary Dispute (which in no way affected their territorial or national interests), will the United States refuse to recognise these precedents, or to give effect to their compact with the nations as expressed in the Hague Convention ?

The American Edition of the NINETEENTH CENTURY, CONTEMPORARY REVIEW, FORTNIGHTLY REVIEW, WESTMINSTER REVIEW, BLACKWOOD'S MAGAZINE, QUARTERLY REVIEW, EDINBURGH REVIEW is identical with the high-priced English editions, printed in England but cost just half as much.

The greatest living writers; the freshest and most helpful subjects; the most notable discussions of current events and thought; the most timely treatment; the most skilful editing—all these make the Reviews the most admirable and most helpful periodicals of the time.

They represent every phase of the world's best culture and are the most trustworthy guides to the best thought and work of the day.

A sample copy free for the asking.

"These leading English Reviews contain more articles by more noted writers on any important subject than any other series. No reader who hopes to keep in touch with the best thought of the day on all current questions of importance can afford to ignore them."—*The Philadelphia Press*.

"It is a most valuable aid to contemporary literature in America that all these great English Reviews are made easily accessible."—*Chicago Inter-Ocean*.

"The writers are always able. . . . The constant reading of these Reviews lets one out into a larger world, and gives breadth and vigor to the understanding. They are cosmopolitan in their view and grasp."—*Zion's Herald*.

"We have literally no rival of the great Reviews. The scholar of human life and thought is obliged to turn to them for thorough discussion of great political and social questions. We cannot get on without them if we care to be in sympathy with our age."—*The New Unity*.

"We advise any of our readers who desire to broaden their minds by their reading to take one or more of the leading English Reviews."—*Engineering News*.

"The topics treated are timely, and the list of contributors is both distinguished and authoritative."—*The Examiner*.

"The best types of the most finished English now written."—*Public Opinion*.

The Character of Queen Victoria.

Reprinted from the Quarterly Review.

Pp. 78 WITH PHOTOGRAPH. CLOTH.

This valuable study of Queen Victoria attributed to Edmund Gosse, but published anonymously, is one of the most intimate sketches of the great Queen that has appeared in print. It contains details of her life not before printed and is a most careful and scholarly estimate of her character.

Mothers!

Mothers!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of Cutting Teeth? If so, go at once and get a bottle of

MRS. WINSLOW'S SOOTHING SYRUP.

It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it who will not tell you at once that it will regulate the bowels, and give rest to the mother and relief and health to the child, operating like magic. Pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere.

TWENTY-FIVE CENTS A BOTTLE.
